

**LOO
CAFÉ**

**WATER
LOOP**

Loo Café x Water Loop is an initiative to create a new model for ecological public toilets that celebrates water and circular systems.

At the crossroads of function, education and experiment, Loo Café x Water Loop builds on the successful Loo Café concept by Ixora Corporate Services. As well as providing free public toilets maintained by revenue from the café, the new model showcases sustainable practices by making them a visible, engaging and interactive part of the building's design. In the face of the climate crisis and increasing water stress, Loo Café x Water Loop explores alternative systems for ecological sanitation that emphasise circularity, and foregrounds interconnections between humans, the environment and the food chain.

A pilot Loo Café x Water Loop will be built in Hyderabad in Spring 2020.
